We residents of Hermosa Beach have invested in our homes for the lifestyle Hermosa offers. The small town atmosphere, quiet neighborhoods, award winning schools, ability to walk and bike, recreation venues, great business and the ability to escape daily tensions of life by strolling along our Beach. We understand the goal of Low Carbon Future commitments that will protect the environment and help create a community we can be proud of. Hermosa Beach's distinctive character and high quality of life need to be preserved and improved without losing sight of our beach culture. My wife and I love Hermosa Beach. I'm committed to Hermosa "The Best Little Beach City"

With my professional and civic background I will focus on the following:

- Hermosa's past to build its future
- Common sense approach to modernizing city facilities
- Advocate for Public Safety and City employees
- Complete 8th Street improvement project
- Access for walkers, bicyclists
- Sewer implementation plan and Sewer fee oversight committee
- Developers to contribute improvements within Hermosa Beach
- Interrelationship with the School District
- Create a visual landmark at the end of our Pier
- Energetic Street and sidewalk renovation plans
- Support community service organizations
- Pacific Coast Highway and Aviation Boulevard renovations
- Attract family type commercial business city wide
- Proactive direction to utility companies for system improvements.
